# OVERVIEW

## About Us

We manufacture the Clearview® line of Railing Systems. Custom-made stainless steel railing systems are our only product and we are the unequivocal leader in the industry. With our innovative component-based design, Clearview® railings eliminate the need for any on-site welding or cutting of posts and top rails. Our detailing department generates CAD (computer-aided design) documents for each railing project. These detailed drawings allow for precise, project-specific fabrication. Our railing systems are fabricated to the highest quality standards and delivered to you ready to be installed with a few simple hand tools. We will build your custom railing system in your choice of either high-quality grade A304 or marine grade A316 stainless steel. Your infill options are stainless steel cable, stainless steel horizontal bar, tempered glass, acrylic and polycarbonate panels.

## Clearview® Railing Systems

Our stainless steel railing systems allow you to enjoy unobstructed views while beautifying your home with their simple elegance. Here are just a few reasons why a Clearview® Railing System is the right choice for your railing project:

- Our all-stainless steel construction provides extra durability.
- Custom components make your railing fit like it was installed by a pro.
- Our design team generates drawings specific to your project.
- No cutting, drilling or welding is required in the field.
- There are many design options available, allowing you to create a truly unique railing.
- All of our systems are designed to meet the latest building codes.
- Nothing else matches the appeal of high-end stainless steels!

# INTRODUCING THE NEWEST CLEARVIEW® LINE: THE OLYMPUS

## HORIZONTAL BAR RAIL

Olympus is the latest addition to the Clearview family of stainless steel railing systems that is well revered throughout the industry. Olympus is a component-based horizontal bar railing line that features patent-pending, universal-joint railing connectors; allowing anyone to create a gorgeous, custom-built railing system without on-site cutting or welding—just simple hand tools. Olympus is the ‘clear’ choice for those wanting a stainless steel railing system that adds beauty to their project.

## Rainier Line - Cable Infill

# RAINIER LINE CABLE OPTIONS

## Cable Installations

### — OPTION 1

Cables are sent in 100' lengths. Fittings, hex nuts and acorn nuts are bagged separately.

### — OPTION 2

Cables are pre-cut and have a fitting attached at one end. You just trim the cable to the proper length and attach the second fitting.

### — OPTION 3

Includes FREE TOOL USAGE! Cable assemblies are shipped cut-to-length, with both fittings attached. Stair cable runs are prepared as OPTION 2 because the bent fitting will not pass through intermediate stair posts.

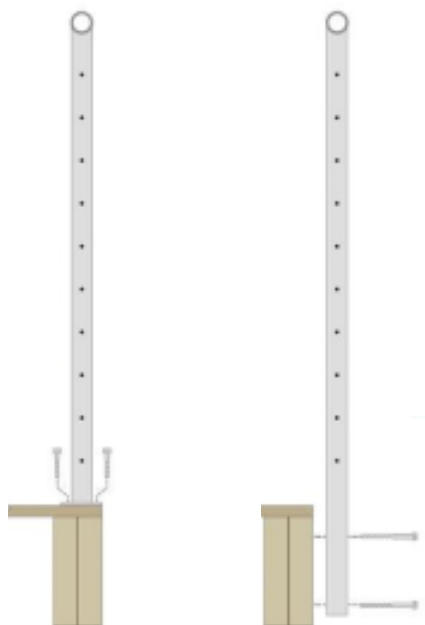

Additional information on cable options and installation are available on our website: [www.AGSStainless.com](http://www.AGSStainless.com)

## MOUNTING OPTIONS FOR ALL PRODUCT LINES
