

WHY ORDER CUSTOM-MADE RAILINGS FROM AGS STAINLESS?

They Will Look a Lot Better on Your Home than Off-the Shelf Railings!

Just as a custom-made article of clothing will look better on you than one grabbed off the department store rack; custom-made railings from AGS will look better on your home than stock railings purchased from a retail supplier. They will fit your home more precisely, they will get you more compliments, last longer, require less work to install and be easier to maintain in the coming years.

Today, most railing products are purchased from lumber yards and large retail building product warehouses. To maintain their low price marketing strategy these companies order and inventory railings from their suppliers in great quantity. So, rather than offering you the perfect railing system for your home, their business model forces them stock large quantities of more generic railing products. Its simple, the less custom the product, the greater percentage of homes they can sell to.

What this means is that although a large retailer is likely to have a railing system that will work for you; it will not necessarily be the best solution for your particular home, style or taste. If you are in an emergency situation these retailers may be your best solution because you can pick up the bulk railing material from them today and immediately start cutting and fitting the pieces together on your deck. However, unless for safety reasons you need to have railings installed in your home within the next 4 or 5 days...***we strongly encourage you to have your railings custom-made, you will be a lot happier with the finished product!***

About AGS Stainless: AGS Stainless Inc., (AGS) manufactures the Clearview® line of Railing Systems. For more than two decades AGS Stainless has been a factory-direct supplier of custom-made stainless steel railing systems. With an innovative component-based design and all stainless steel construction; Clearview® railings eliminate the need for any on-site welding or cutting of posts and railings. AGS' design department generates CAD (computer-aided design) documents for each railing project insuring precise, project-specific fabrication. Each Clearview® railing system is made to order to the highest quality standards, and delivered to you ready to be installed-with a few simple hand tools. We offer stainless steel components in either high-quality grade A304 or marine grade A316, and our infill options are: stainless steel cable, stainless steel horizontal bar or tempered glass panel. For more information, visit: www.AGSStainless.com or call 888.842.9492.
