## **"Dream It...Draw It...Win It!" Solar Starlight Design Contest from AGS Stainless**

*Contest Entry Deadline is October 31<sup>st</sup>, 2016*

**Bainbridge Island, Wash.** – To celebrate the launch of the Starlight Designer Series – the brand-new group of decorative designs to the ever-popular line of solar-powered, LED exterior accent lights – [AGS Stainless](http://www.agsstainless.com) proudly unveils a creative and fun design contest where anyone can literally: Dream It...Draw It...Win it! AGS Stainless is the well-revered manufacturer of custom-made, prefabricated stainless steel railing systems, creating railings for some of the world's most distinctive homes and commercial properties.

AGS Stainless is encouraging anyone looking to channel their inner-Picasso to create their own unique design vision, inspired by the Starlight Designer Series. Design enthusiasts simply complete the entry form via the [Starlight Dream Design Contest](http://www.agsstainless.com) website by October 31<sup>st</sup>, 2016. The creator of the entry receiving the most "votes" will receive a Starlight Designer Series prize package which includes six Starlight solar accent lights featuring their very own, unique design!

Originally introduced in 2014, Starlight accent lights are quietly revolutionizing the outdoor lighting industry. These highly-functional, solar-powered lights are precision crafted out of durable A316 marine grade stainless steel resulting in a built-to-last, functional, design feature that will complement any outdoor space. Because Starlight does not require any wiring, transformers or electrical know-how, they can be installed quickly and provide a great alternative to energy-consuming, low-voltage lights requiring wiring and a power source. The Starlight Designer Series transforms their durable stainless steel housings with precision-cut patterns that range in styling from craftsman to modern. Optional finishes are brushed stainless steel and powder-coated stainless in black with custom colors available on request.

“We are excited to review and showcase the creativity of anyone interested in making their mark with our unique Starlight – so if you’ve got a design in mind that just needs to be shared – now is the perfect time to send us your best one!” says Kevin T. Harris, Director of Sales & Marketing at AGS Stainless.

“Our hope is this contest is easy and fun to enter while showcasing some great-looking Starlight designs that capture attention – and most importantly – the most votes.”

#### **TO ENTER**

1. Download the Contest Design Template <http://solarstarlight.com/contest/template/>
1. Draw your StarLight *Dream Design* in the indicated area
2. Fill out the Contest Entry Form and upload a copy of your completed Design Template
3. Invite friends, family, co-workers to vote for your design!

No purchase necessary. Void where prohibited. Contest open to all skill levels and backgrounds alike; non-designers are highly encouraged to participate. For full contest rules and details, see the official contest Terms & Conditions by visiting: <http://solarstarlight.com/contest/terms/>

AGS Stainless is known for producing products of the highest quality with the consumer in mind, StarLight is no different. Each Starlight is made of 316 marine-grade stainless steel for durability and ease of maintenance. A rechargeable AAA NiMh battery that replenishes itself during daylight hours via the 1-1/2" x 3" angled solar panel is included, able to produce five to six lumens of light for up to ten hours. StarLight will mount to almost any surface, making them the perfect lighting solution for both new and existing outdoor spaces.

The functionality and aesthetics make StarLights the unique lighting accessory suitable for a wide-array of residential and commercial applications; improving safety by illuminating pathways and exterior stairs, brightening driveways and waterfront docks or simply positioned along walkways to create a welcoming visual affect. The possible uses for StarLight solar accent lights are nearly endless!

“Starlight is designed to enhance any call-out area – outdoor living spaces, interior stairways, second-story railings – you name it,” explains Kevin T. Harris, Director of Sales & Marketing at AGS Stainless. “It is so simple yet elegant it quite literally lights up any space needing a bit of light.”

**About AGS Stainless:** AGS Stainless Inc., (AGS) manufactures the Clearview® line of Prefabricated Ornamental Railing Systems. For more than two decades AGS Stainless has built railings for some of the world’s most distinctive homes. With an innovative component-based design and all stainless steel construction; Clearview® railings eliminate the need for any on-site welding or cutting of posts and top rail. AGS’ design department generates CAD (computer-aided design) documents for each railing project insuring precise, project-specific fabrication. Each Clearview® railing system is made to order to the highest quality standards, and delivered to you ready to be installed-with a few simple hand tools. AGS offers custom, prefabricated railing systems from high-quality marine grade A316 stainless steel with stainless steel cable, stainless steel bar, wire mesh or tempered glass panel infill options. For more information, visit [www.AGSstainless.com](http://www.AGSstainless.com) or call 888.842.9492.
